### Verge S8i Folding Bike

The Verge S8i is the world's most versatile ultra-low-maintenance folding bike. It's designed around a Gates belt drive, Shimano's 8-speed internal-gear Alfine hub, and a ceramic-black matte frame. The result is a practically silent super-commuter with no greasy parts or protruding derailleurs, plus a gear range for any incline. The S8i has an extra-long wheelbase and Schwalbe Big Apple tires, so it rolls confidently over any and all potholes. It will get you there quickly, cleanly and most importantly, in style.

- Shimano Alfine 8-speed internally geared hub for low-maintenance riding
- Revolutionary Gates Carbon Drive drivetrain for a quiet, light and clean bike
- Shimano Deore hydraulic disc brakes for extreme stopping power
- Andros™ handlebar stem for tool-free riding position adjustments on the fly
- Bright, wide-beam Valo™ 2 front light powered by the BioLogic Joule™ 3 electricity-generating hub
- Schwalbe Big Apple tires with Kevlar puncture protection
- Folds in under 10 seconds to fit under a desk
- Fenders for rainy days

## Verge S8i Features

### Physis™ 3D Handlepost: The new benchmark

Five patented technologies and unique manufacturing technology add up to the strongest, stiffest folding handlepost available. The Physis uses a special manufacturing process called 3D forging, which forms the post from a single piece of aluminum, eliminating all welds.

### Andros™ Stem: Adjust to fit

The Andros is our patented adjustable stem that lets you set your handlebars where you want—no tools, no fuss. In just seconds, you can set your riding position to long and low in a tough headwind, or upright and comfy for riding around town. You decide how you want to ride and the Andros makes your bike fit.

### Shimano Hydraulic Disc Brakes: All-weather stopping power

Shimano hydraulic disc brakes deliver powerful stopping power in all weather conditions with the touch of a finger.

### BioLogic Joule™ 3 Dynamo Hub: Make your own juice

A hub dynamo is the ultimate green power source because it generates electricity while you ride—no batteries or recharging required. The Joule 3 is one of the very lightest and smallest dynamo hubs on the market and is one of only a handful that exceeds the High Efficiency (HE) 70% threshold. Say goodbye to batteries. Winner of a Eurobike award, the Joule 3 meets German StVZO standards for a 6V/3W hub—meaning it can power both a front and rear light.

### Shimano® Alfine 8 Hub Gear: State of the art

The Alfine 8 is Shimano's masterpiece of an internal hub gear, packing 8 evenly spaced gears inside a weatherproof hub. The hub has very low rolling resistance and features silky smooth shifting so you're ready to tackle anything on the commute.

## Schwalbe Big Apple Tires: Cush for your tush

Big Apples are special because they're fast rolling AND super comfy. Sounds hard to believe but you'll just have to take them for a ride to become a believer.

## Gates Carbon Belt Drive: Clean living

The Gates belt drive is the ultimate commuter drive system: it's clean, light, quiet, and requires zero maintenance.

## Valo™ 2 Light: Floodlights for your ride

The Valo 2 is a powerful light designed to help you navigate safely at night. The unique design integrates directly into the handlebars of an Andros or VRO-equipped Tern bicycle so it's protected from theft and damage. And because it's hub-dynamo powered, you never need to worry about batteries or charging again. Flick a switch and you have instant light.

## Verge S8i Specifications

Color	
Wheel Size	20" wheels
Speeds	8
Weight	14.3 kg (31.5 lb)
Folding Size	42 x 81 x 73 cm (16.5" x 31.9" x 28.7")
Folding Time	10 sec
Frame Sizes	One size
Gear Inches	27" - 83" (2.15 - 6.60 m)
Distance: Seatpost to Handlebar	Max. 660 mm (26") Min: 600 mm (23.6")
Distance: Saddle to Pedal	Min: 710 mm (28") Max: 960 mm (37.8")
Suggested Rider Height	142 - 190 cm (4'8" - 6'3")
Max Load Weight	110 kg (243 lb)
Frame	<b>Frame</b> Tern Verge, hydroformed 7005-Al w/ smooth TIG welding, 3 patented technologies
Fork	Tarsus, 6061-AL, hydroformed
Handlepost	<b>Cockpit</b> Tern Physis 3D (G2), 3D forged, 5 patented technologies
Stem	Tern Andros (G2), adjustable, forged construction, patented technology
Headset	Flux Pro, angular contact bearings, Physis integrated
Handlebar	Kinetix Comp, double-buttet 6061-Al
Grips/Bar Tape	Phorm, w/ bar end

## Folding Bikes : Tern Verge S8i Folding Bike

---

Saddle	BioLogic Phia, PrimeGel padding
Seatpost	Stasis by Syntace, 7050-Al, hard-anodized
Seatpost Clamp	Syntace OverLock
	<b>Brakes</b>
Front Brake	Shimano Deore, hydraulic disc
Rear Brake	Shimano Deore, hydraulic disc
Brake Levers	Shimano Deore, hydraulic disc
Brake Cable & Housing	Shimano
	<b>Wheels</b>
Front Hub:	BioLogic Joule 3 dynamo, disc
Rear Hub:	Shimano Alfine, 8 spd
Spokes and Nipples:	Stainless, double-butted
Rims:	Kinetix Comp, doublewall
Tires:	Schwalbe Big Apple 55-406, puncture protection, Reflex
	<b>Transmission</b>
Shifter(s)	Shimano Alfine, 8 spd
Crankset	Gates Carbon Drive
Cassette/Freewheel	Gates CDX, precision CNC machined cog
Bottom Bracket	Cartridge, sealed bearings
Chain	Gates Carbon Drive belt
Pedals	MKS UB-LITE EZY, QR, Black
Shifter Cable & Housing	Shimano
	<b>Bells and Whistles</b>
Bell	Pitch, brass
Kickstand	Rear mount, Pletscher design
Clip System	Magnetix 2.0
Luggage Socket	Yes
Front Light	Tern Valo 2, integrated, 41 lux/150 lumens
Rear Light	Spanninga Pixeo XDS
Fenders	SplashGuard, stainless hardware
Rack(s)	Cargo Rack (included)

**Note:** These are our standard model specifications. The specifications for your country may differ slightly. We do our best to ensure that the specifications listed here accurately reflect the exact parts found on our production bikes. However, component changes do occur for various reasons and there may be brief delays on site updates. We reserve the right to make component changes without prior notification, which may cause discrepancies with the information listed on the web.
